Publish
Which Azure service would you like to use to host your application?
Target
Specific target
Azure Function App
Publish your application code to a serverless compute that scales dynamically and runs code on-demand
Azure Function App Container
Publish your application as a Docker image to Azure Container Registry and run it on Azure Function App
Azure Container Apps (Linux)
Run scalable containerized applications and microservices on a serverless platform in Azure
Azure Container Registry
Publish your application as a Docker image to Azure Container Registry
